MV06-LAMP TABLE

Care Guide

- As a natural material, wood will continue to move and be affected by its surroundings.
- Changes in humidity and temperature can lead to warping and /or cracks in the wood. Therefore, it is advisable not to place your furniture against a direct heat source or air conditioning unit.
- Over time, with changes in the atmosphere and light, the wood will mellow.
- To ensure an even tone we recommend that it is not left in direct sunlight and any objects placed on the furniture should be regularly moved around to help avoid colour differences.
- If you have chosen an extending dining table, it may be beneficial to leave your table extended for a period to allow the extension leaf to mellow with the rest of the tabletop.
- Your furniture has been finished with an NC Lacquer.

General care

- Assemble the product in the room intended for use.
- Always lift your furniture to move it, never drag or push it as this can cause damage.
- Regularly check all fixings and tighten if necessary.
- Wipe with a soft, slightly damp, lint free cloth. Buff with a dry, clean cloth.
- Wipe up spills immediately, never leave liquids sitting on the surface as this can damage the finish.
- Always use mats and coasters to protect the surface when in use.
- Never place hot items directly onto the surface.
- Do not use silicon-based furniture polish as the silicon can affect the finish.
